

Massive Networks Expands Mixed Carrier Ethernet to Midwest

Fully Managed Network Solutions Designed for Enterprise Businesses

DENVER - March 22, 2017 - [PRLog](#) -- With the acceleration of digital transformation, Enterprise businesses need flexible and secure networking solutions at an affordable price. To help enterprises achieve greater control over their networks, Massive Networks is expanding its network by adding an additional 10 GIG redundant connection. This expansion will open up its services to the Midwest region of the US by expanding its 10gig redundant connect from five carriers to six.

With years of experience in the telecom industry, Massive Networks aims to solve Enterprise businesses' connectivity problems through its Massive One Pipe Multi-Connect Network Solution. By using existing infrastructure, Massive Networks merges multiple and dynamic streams of data through a single pipe. The Massive Network One Pipe Multi-Connect Solution can provide Enterprise businesses with an optimal performance so the organization can run smoothly and efficiently.

According to Chief of Operations Kevin Flake, "This approach provides our clients with superior performance from bandwidth intensive services like voice, data, web services, video, and backups – ultimately giving customers the speed, performance, and security they need to run their daily operations."

Learn how Massive Networks can expertly use a rich mix of Carrier Ethernet technologies to improve your business operations in an evolving marketplace:
