

## **Massive Networks Opens Its Doors To All Cloud Providers**

*Introducing A New Cloud Marketplace Community For Providers Who Are Seeking To Engage Their Enterprise Customers With A Private Connection*

**LOUISVILLE, Colo. - July 25, 2017 - [PRLog](#) -- Massive Networks**, an enterprise-class data transport solution provider, today announced that the company's Cloud Connect is now open to all Cloud Providers looking to offer private networking services to their customers. Through the Massive Networks One Pipe Multi-Connect product, you get separate and private streams running within the solution. As a result, enterprise businesses can keep private data off the public Internet, enabling superior bandwidth performance and security, while getting the most out of every network dollar.

"The Massive Networks Cloud Connect Marketplace is a valuable new channel offering for our industry-leading enterprise solution," said Kevin Flake, COO of Massive Networks. "We are delighted to open our Cloud Connect doors to all Cloud Providers to better support the many enterprises that need our unique and full-featured on-demand service."

Massive Networks Cloud Connect provides users with one-to-many Ethernet switching capabilities to create a virtual "on-ramp" to solutions from specific cloud providers within the Massive Networks cloud-enabled data center campuses. In an industry where scalability, connectivity, cost effectiveness, and rapid deployments are of prime importance, the Cloud Connect Marketplace will help create a community of providers whose member's can benefit from improved performance, added security, and access to the array of Massive Networks data center campuses across the country.

"Opening our Cloud Connect to all cloud providers marks a significant milestone for our data center cloud environments by simplifying the way businesses can connect to their network and cloud solution providers," said Paul Mako, CEO of Massive Networks. "The addition of cloud service providers is a testament to the growing diversity and strength of our Cloud Connect service."
