

Massive Networks CTO Paul Mako, joins GCI, at the IT Expo for panel discussion

Heading to Fort Lauderdale next week for the ITEXPO? Be sure to watch the panel, "Virtualization, Automation, and DevOps – Why it's taking so long for Telco's?" discussion, moderated by Paula Bernier, the Executive Editor of TMC.

DENVER - Feb. 6, 2018 - [PRLog](#) -- Massive Networks, announced today that Paul Mako, its CTO, will join an executive from General Communication Inc. on the panel, which takes place on **Friday, February 16th from 9:00 AM to 9:55 AM, room number 208.**

Mako, along with Justin Burgess, VP of New Markets at GCI, will offer insight on the latest in modern DevOps, automation, and virtualization within the telecommunication space, as well as the challenges that enterprises may face to support the delivery and consumption of their communication needs.

Massive Networks is a premier network transportation and colocation provider that specializes in Premium-Blended Internet and layer 2 Private Line Transport connections from office-to-office, data centers, and cloud applications for hard to reach facilities. With over 1.7 million fiber-lit buildings nationwide, Massive Networks can transform network connectivity from bandwidth-intensive services with their One pipe Multi-Connect Solution.

"I look forward to joining GCI's thought leader Justin Burgess, on the panel at the IT EXPO, an event that unites all sectors of the IT marketplace to drive transformation for service providers, resellers, and the enterprise mid-market," states Mako. "This conference is critical for companies looking to expand their services, update their current applications, and understand what options are available to them to make effective buying decisions."

In addition to the panel discussion, **Massive Networks will be hosting an exhibit at booth 213**, in the IT Expo tradeshow hall. Attendees are encouraged to stop by to learn about private network connectivity to their colocation facilities, cloud applications, and managed services.
