

**SO MANY CLOUDS...
ONE MASSIVE CONNECTION**

- Speeds available from 10 Mbps to 10Gbps
- One Port Many Clouds
- Multiple configuration options (Point-to-Point, Point-to-Multipoint)
- Global availability

BENEFITS FOR CORPORATE IT CUSTOMERS

- Improved performance of cloud-based applications and workloads through high-throughput, low-latency connections
- Increased security by keeping applications within your data center's local area network
- Lower costs, enabled by reduced WAN expenses

BENEFITS FOR NETWORK AND CLOUD SERVICE PROVIDERS

- Expanded geographic reach for your services through the Massive Cloud Exchange locations in top markets around the world
- Traffic aggregation over one-to-many connections enable highly efficient use of bandwidth to serve greater numbers of customers at lower cost
- Secure, high-throughput, low-latency connectivity that greatly expands the potential workloads and applications that your customers can migrate to the cloud
- Access to the data center industry's largest, most diverse ecosystem of enterprise software platforms

DATA SHEET:

MASSIVE CLOUD EXCHANGE

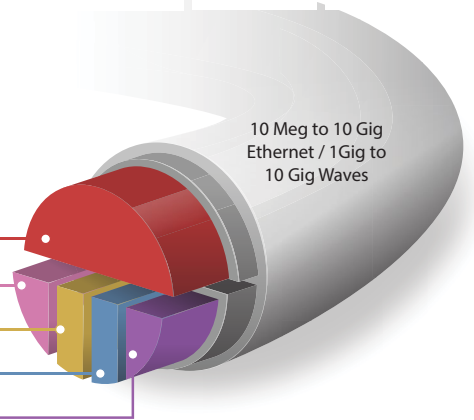

WITH THE MASSIVE CLOUD EXCHANGE

you can extend your WAN to include major cloud platforms from any location, these are advanced high-performance connections which are secure and dedicated to you. Cloud Exchange connections do not go over the public Internet. With our proprietary "one port, many connections" technology you benefit from faster speeds, less latency, much better security, and potential cost savings from typical Internet connections.

One Pipe Multi-Connect

- Premium Blended Internet
- Realtime Voice (QoS)
- MegaLan and GigaLan
- Massive Cloud Exchange
- Data Center Direct Connect

The Massive Networks solutions enables maximum port density by delivering IP Transit LAN and a Private layer 2 connection to the Massive cloud exchange all on a single connection.

Ask your Massive Rep today and stay ahead of your competition!
