

PEERING EXCHANGE

Bypass the Internet and go direct to get the fastest and most secure paths possible.

CUSTOMIZED ROUTES

Our blended mix of bandwidth providers gives us the ability to provide you with the best routes for all of your Internet traffic.

BANDWIDTH

Our “never-down” policy relies on the redundancy of multiple providers that enable a seamless integration to provide endless routing and throughput possibilities, resulting in a higher level of internet performance.

INTELLIGENT ROUTING

Routing traffic across multiple tier 1 internet backbones provides reliable, stable and consistent connectivity. Predictive routing identifies the most efficient path for your internet traffic in real time, minimizing the risk of network outages, bottlenecks, latency, etc.

DATA SHEET:

INTERNET SERVICES

ALWAYS ON. FASTEST ROUTE.

MASSIVE PREMIUM BANDWIDTH

Accessing today’s public internet is a given for enterprises of every size. Speed, reliability, and global connectivity are all important.

So, why settle for just one internet provider?

With the massive networks premium bandwidth service, you’re service is guaranteed. Our internet services are a blend of up to 12 providers on a 10gig private backbone. Essentially making your business critical access, bulletproof.

Isolated Public Connections

Our exclusive layer 2 network data streaming approach isolates core data services from the public internet on a single handoff from our fiber backbone, increasing security and privacy.

Aggregated carrier services

Aggregating carrier services across your entire portfolio with massive networks gives you a single point of contact for support and network management.
